

Earth Matters

Climates and Biomes

Key Concepts -

Care, Responsibility, Sustainability

Key Vocabulary

Biome - a large naturally occurring community of flora and fauna occupying a major habitat, e.g. forest or tundra.

Habitat - the natural home or environment of an animal, plant, or other organism.

Water cycle - a way in which water moves around the world.

Photosynthesis - the process by which green plants and some other organisms use sunlight to synthesize nutrients from carbon dioxide and water

Adaptation - the process of change by which an organism or species becomes better suited to its environment.

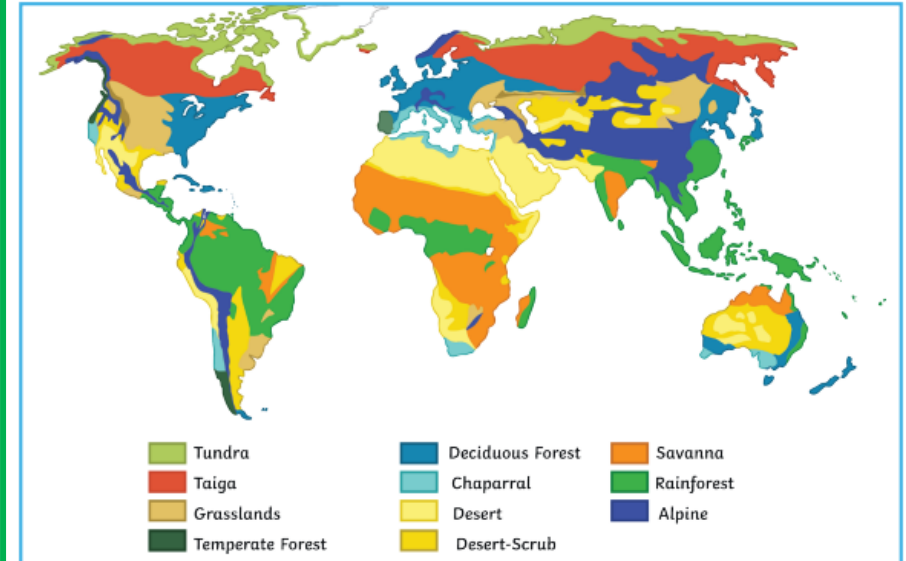

7 Biomes

- Rainforest
- Savannah
- Tundra
- Taiga
- Desert
- Temperate
- Grassland
